Re: Z-15-005 - Laurel Hill Valley Citizen's Association Response Addendum

Dear Mr. Wilson:

This letter is a short response to the letter submitted into the record earlier today by Rick Satre. Mr. Satre lists several perceived short-comings of one of our maps

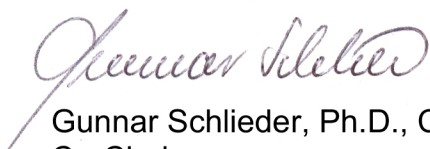

LHVC has submitted six maps in total into the record:

1. LCOG "Unofficial Map of the Metro Plan Diagram"
2. LHVC Sheet 9/2/15-01: Overlay of Applicant's Sheet ZC-2 onto ZC-3
3. LHVC Sheet 9/2/15-02: Overlay of Applicant's Sheet ZC-2 onto ZC-3 to True North
4. LHVC Sheet 9/2/15-03: Overlay of Applicant's Sheet ZC-2 onto hi-res scanned MPD.
5. LHVC Sheet 9/2/15-04: Overlay of Applicant's Sheet ZC-2 onto partial scanned MPD.
6. LHVC Sheet 9/2/15-05: Overlay of TL Maps onto Applicant's Sheet ZC-3

All of these maps produce essentially identical positioning of the applicant's property onto the Metro Plan Diagram. Four of those maps use the applicant's own boundary survey (ZC-2). Neither the LCOG map nor our sheet LHVC 9/2/15-05 use the applicant's materials. Sheet LHVC 9/2/15-05 was submitted only to show that maps commonly used by local government entities (COE, Lane County, LCOG) are perfectly consistent with maps generated from the applicant's own materials. This includes LCOG's overlay of the tax lots from their GIS database and an overlay of the maps used by the County's Tax Assessor onto the Metro Plan Diagram.

These maps were not intended for any other purpose than to show consistency with the applicant's own materials if those are used appropriately.

Sincerely,

Gunnar Schlieder, Ph.D., CEG  
Co-Chair  
Laurel Hill Valley Citizens
